

AI Growth Specialist - Home Assignment

Introduction

Thank you so much for your time so far – we're excited to learn more about how you think about growth and optimization.

You may present your answers in a slide deck, document, or any format that best showcases your ideas. Feel free to reach out if you have any questions.

Assignment #1: LP Conversion Optimization for AI Humanizer

Context: Grammarly wants to tap into the **AI Humanizer** market. To do so, Grammarly added a new AI Humanizer feature to its product suite and is promoting it via a sponsored Google Search ad targeting users who searched for the keyword **"free ai humanizer"**. Users who click the ad are directed to this landing page.

Current Landing Page & Performance

The current LP is a quiz-based experience. Below are the performance metrics from the last 30 days:

- **Page renders:** 84,200
- **Signups (signup CTA clicks):** 8,420
- **CVR (Signups / Page renders):** 10.0%

Funnel Breakdown (% of page renders)

Stage	% of Users	Users
Page render	100.0%	84,200

Stage	% of Users	Users
Clicked “Start Humanizing”	93.0%	78,300
Q1 — Sentence length	92.5%	77,900
Q2 — English variant	55.0%	46,300
Q3 — Formality	48.0%	40,400
Q4 — Vocabulary	47.4%	39,900
Q5 — Writing style	47.25%	39,800
Q6 — Main goal	46.0%	38,700
Q7 — Humanization slider	43.0%	36,200
Q8 — Light humor	42.5%	35,800
Signup / unlock modal viewed	32.5%	27,400
Signup CTA clicked (CVR)	10.0%	8,420

The Task

Improve the landing page and increase **CVR (Signups / Page renders)**.

Constraint: Keep the LP in Quiz Format.

Your decisions should be grounded in:

- **Current performance:** The funnel data above.
- **Market research:** Competitor landing pages and value propositions.
- **Product intuition:** What a user searching for "free ai humanizer" actually wants.

Deliverables

- **Deliverable #1:** A concise optimization plan (rationale and recommendations).
- **Deliverable #2:** 1 functional HTML file with the improved experience.
